

**EuProGigant** stands for „European Production Giganet for calamity-avoiding self-orchestration of value chain and learning ecosystems“.

The binational research project for the **smart and sovereign use of data in the European manufacturing industry** started on 1 March 2021 and is carried out by an Austrian-German consortium. The consortium leaders are the Pilotfabrik Industrie 4.0 at TU Wien and the PTW at TU Darmstadt. EuProGigant received a 5 Mio. EUR grant, the total budget amounts to 8.5 Mio EUR.

The goal of EuProGigant is building a multi-location, digitally networked manufacturing ecosystem which makes the European manufacturing industry **more sovereign, more resilient and more sustainable**. The consortium focuses on **data-driven value creation** and follows the principles of the European data infrastructure Gaia-X.

With **seven industrial use cases**, EuProGigant is the lighthouse project for Gaia-X in the manufacturing industry.

The **16 project partners** are supported by an **industrial advisory committee**, an **international scientific advisory board** and an **inter-generational advisory board**.

EuProGigant is an EU wide registered trademark in word and image of the TU Wien and the TU Darmstadt.
